Monitoring

Monitoring Services

Reactive CCTV Monitoring Using motion detection or video analytics, we can respond to activations at your site, issue audio warnings and request police response where required. We are on the forefront of testing new technologies.

Visually Verified Monitoring

As well as offering standard intruder and fire monitoring, we can offer a visual confirmation of these alarms. Drastically reducing false activations and your chances of losing your URN.

Live CCTV Monitoring

From our purpose-built ARC/RVRC, we can monitor your systems 24 hours a day, 365 days a year with access to live images. We also have a secure web and mobile portal, where you can check the live feeds yourself.

Intruder Alarm Monitoring

These are grade 2 alarm certified solutions giving additional peace of mind and protection along with visual verification and home automation.

**ADVANCED FEATURES, EASY DEPLOYMENT
& RELIABLE PERFORMANCE.**

**One-Person
Deployable**
(All Parts Below 25kg)

**360°
Coverage**

**Linkable To App
& 24/7 ARC**

**You can trust our system to provide the
protection your site needs.**

POWERFUL PORTABLE SOLAR-POWERED PROTECTION

- 360° Degree Camera Motion Detectors
- Effective Visual Deterrent
- Reliable Off Grid Solar Power Solution
- 1 Person Deployable
- 'Voice Alert' If Required

External Siren with
Adjustable Sound
(Wireless)

External Motion
Detectors with
Camera

Tall Enclosure
Acts as Effective
Visual Deterrent

4x Solar Panels
& Controller for
Consistent Power

Hire

Benefits of Hire

- Low weekly cost
- Delivered and set up on site
- Managed and maintained by us
- Fully monitored
- Mobile response available
- Short term/long term options
